

DAKSH MALVIYA

Full-Stack Developer | AI Enthusiast

hustlingkiddo@gmail.com | github.com/dakshmalviya-x | linkedin.com/in/dakshmalviya | leetcode.com/u/DakshMalviya

SUMMARY

3rd-year Computer Science Engineering student at JUET Guna, focused on full-stack web development and applied AI. Experienced in building production-ready, polished web applications end-to-end — from responsive front-ends to full-stack platforms with authentication and third-party API integrations. Comfortable using AI-assisted workflows to accelerate backend development and ship complete products quickly.

EDUCATION

JUET Guna — B.Tech in Computer Science Engineering

Expected Graduation: 2028

SKILLS

Languages: C, C++, Java, Python, JavaScript, HTML, CSS

Frontend: HTML, CSS, React

Backend: Node.js, Express (AI-assisted development)

Databases: MySQL

PROJECTS

GameMood — AI-Powered Game Recommendation Platform

React · Vite · Node.js · Express · JWT · RAWG API · CheapShark API

- Built a full-stack platform recommending PC games by mood, with wishlist and JWT-based authentication
- Integrated CheapShark API for real-time cheapest-price lookups and RAWG API for game data
- Live: game-mood-netflix-for-gamers.vercel.app

Meridian Structures — Business Website

HTML · CSS · JavaScript

- Designed and built a responsive 4-page business website for a structural engineering consultancy
- Implemented a dark blueprint-themed design, full accessibility support, and a validated contact form
- Live: meridian-structures-business-websit.vercel.app

StudySync AI — AI Study Companion *(In Progress)*

React · AI tooling

- Building an AI-assisted study companion to help structure and accelerate focused study sessions
